

TRIPLE PITCH DRAINPAN

STOP WASTING TIME AND MONEY DE-ICING DRAINPANS

Ice buildup in air cooler drainpans wastes time and money! Colmac has developed a number of unique technologies that eliminate the need for de-icing the drainpan:

FEATURES & BENEFITS

- Triple pitch design completely clears water after defrost
- No low spots or pooling of water
- Full radius inlet to drain connection
- Single drain connection at end of pan
- Hot gas loop with continuous full length contact
- Hot gas loop piping designed to quickly clear defrost ammonia condensate

THE PERFECT PAN

Pitching the drainpan in three directions (front to center, rear to center, and end-to-end) combined with continuous hot gas loop contact has resulted in “the perfect pan”!
