Colmac Releases New Refrigeration Load Simulator Software

Colville, WA: Colmac announces a new refrigeration load simulator with a new approach. The simulator is based on state-of-the-art equations that perform heat and mass balance for your entire facility.

The software has completely customizable specifications including room shape, building material, and door operation. With an integrated ASHRAE climate database, the software is able to accurately produce sensible and latent loads, room rh, and defrost frequency. A seamless transition into the A+Pro evaporator sizing software helps clients select the appropriate evaporators for each room, based on the calculations from the Refrigeration Load Simulator Software. About Colmac Coil Manufacturing, Inc.

Since 1971 Colmac Coil has provided customers worldwide with innovative heat exchangers and heat transfer solutions for industrial refrigeration, HVAC, power generation, and gas compression applications. The company builds heating and cooling coils, refrigeration air coolers and blast freezers, air-cooled fluid coolers and condensers, and heat pipes for heat recovery. State-of-the-art selection software accurately calculates heat exchanger performance for a wide range of working fluids, materials, and operating conditions. World-class manufacturing facilities in both Washington State and in Illinois provide customers with fast delivery times and outstanding after sales support. www.colmaccoil.com
